MEASURES FOR CYBERSECURITY

Don Bosco College (Co-Ed), Yelagiri Hills has implemented effective **cybersecurity measures** to ensure the safety, integrity, and confidentiality of digital data and information systems used for academic and administrative purposes. The institution recognizes the importance of protecting sensitive information against unauthorized access, cyber threats, and data breaches.

The campus network is secured through **firewalls, antivirus software, and regular system updates** to safeguard computers, servers, and digital infrastructure. Licensed and updated security software is installed on institutional computers to protect against malware, viruses, and phishing attacks. Access to systems and data is controlled through **password-protected user accounts** with role-based permissions.

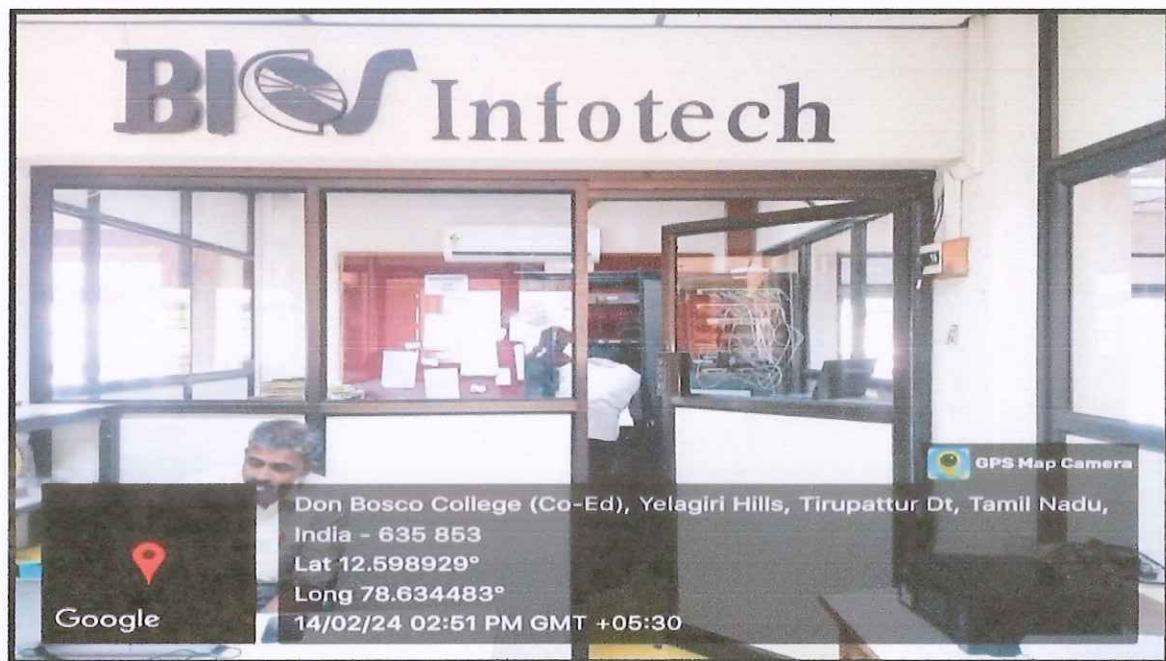

Regular **data backup procedures** are followed to prevent data loss and ensure continuity in case of system failures. Faculty, staff, and students are periodically sensitized through awareness programs on safe internet practices, password security, and responsible use of digital resources.

The institution continuously monitors its IT infrastructure and updates security protocols as required to address emerging cyber threats. Thus, the cybersecurity measures adopted by the college ensure a safe and secure digital environment, supporting effective teaching, learning, and administrative operations.
